TIAGO GOOSSEN DE ANDRADE

Fortaleza, CE — Brazil | tiagogoossenbra@gmail.com | github.com/jga01 | linkedin.com/in/tiago-goossen

TECHNICAL SKILLS

Languages: C# (Advanced), TypeScript (Advanced), JavaScript (Advanced), C (Advanced), Python (Intermediate), SQL (Intermediate), Java (Intermediate)

Frameworks & Tools: .NET 8, Next.js, React, NestJS, Angular, Tailwind CSS, MediatR, Prisma, LangGraph, FastAPI, Docker, Terraform, Redis, AWS (EKS, Lambda, S3)

Methodologies: Agile, Scrum, CI/CD, CQRS, Clean Architecture, DDD, Multi-tenancy, Gitflow, SOLID

PROFESSIONAL EXPERIENCE

Fullstack Developer Feb 2025 — Present

Blis AI — Remote

I develop a multi-tenant enterprise SaaS travel management platform with AI-powered chat agents. I contribute across the full stack: .NET 8 API (CQRS/Clean Architecture), Next.js 16 frontend (React 19, Tailwind, Zustand), and Python multi-agent system (LangGraph, FastAPI, Celery). Features include hotel/flight booking, real-time approval workflows, and generative UI rendered from agent responses.

Fullstack Developer Sep 2025 — Present

VipSeg Brasil Protecao Veicular — Fortaleza

I develop a multi-tenant SaaS platform (database-per-tenant architecture) for managing vehicle protection associations using NestJS/Fastify, Next.js 16, PostgreSQL, and Redis. Features include AI-powered vehicle inspection (OpenAI Agents), real-time chat with WhatsApp integration, and billing system processing 30K+ boletos/month via Stripe.

Systems Analyst Apr 2024 — Feb 2025

Instituto Atlantico — Fortaleza

Worked on enterprise projects using .NET, Angular, and PostgreSQL. Contributed to system architecture and feature development for large-scale applications.

Software Development Intern Apr 2022 — Apr 2024

Instituto Atlantico — Fortaleza

Started as intern, progressing through full-stack development with .NET, Angular, and SQL Server. Gained experience in enterprise software development practices and Agile methodologies.

EDUCATION

B.Sc. Computer Science 2024 — Present

Universidade de Fortaleza (Unifor) — Fortaleza, Brazil

SELECTED PROJECTS

Proteus — AI Autonomous Agent Daemon
Modular AI daemon running 24/7, handling 3 concurrent tasks autonomously via WhatsApp/Telegram. Features RAG/semantic search, memory consolidation, multi-model orchestration (Claude + Gemini), and automatic module generation.
TypeScript, Node.js, MCP Protocol, Claude, Gemini, SQLite

HabilitAqui — Driving Instructor Marketplace
Full marketplace with dual booking flows, Stripe Connect payments (PIX + card), real-time chat, and instructor verification. 132 commits in 40 days, 22 DB models, 60 API routes. Live at habilitaqui.com.br.
Next.js, React, Prisma, PostgreSQL, Stripe Connect, Socket.IO, Docker

SeaEel — 3D Graphics Engine
3D rendering engine built from scratch with custom shader pipeline, vertex/fragment shaders, and scene management. No engine frameworks — everything from first principles.
C, OpenGL, GLFW, GLSL Shaders, Nuklear UI

LANGUAGES

Portuguese (Native), English (Fluent), Dutch (Basic)
